NOTES:

1. Turnaround Time: During the critical harvest period (August 1 - Sept. 30 in the Northern hemisphere), lab reports are emailed no later than the next business day for Hop Acids and within 3 business days for Hop Oils. Samples analyzed at times other than harvest usually take about 5-10 days. If you need fast turnaround, call and we'll take care of you.
2. Moisture content makes no difference for testing. In order to calculate your results to 10% moisture simply:

$$\text{Tested acid value} \times \left(\frac{90}{100 - \% \text{moisture}} \right)$$
3. ¹ Please review and supply the minimum amount of sample required per test.
4. Ship sample(s) to **KAR Laboratories, Inc.**
 4425 Manchester Road
 Kalamazoo, MI 49001
